

## Wellness Product Guidelines

At Oryana we believe in nurturing the whole body, and just like the food we sell, we search out and select Wellness products for the integrity of their ingredients and outstanding quality. We work closely with companies we trust to select nutritional and botanical dietary supplements and vitamins, which are professionally formulated and thoroughly tested. The Wellness Department also offers a wide variety of high quality beauty and body care products that support health by providing alternatives to those products that contain ingredients known to pose a health risk while at the same time meeting the needs of a large and diverse customer base. Through careful product selection, product knowledge and dedication to excellent customer service Oryana's Wellness Team educates and assists our customers in finding the products that work best for them.

Taking into consideration availability and price, the Wellness Department prioritizes products that are:

- made with Certified Organic ingredients
- Good Manufacturing Practices (GMP)\* certified
- free of ingredients identified as health risks
- locally and regionally produced
- made without GMO ingredients
- Certified Fair Trade
- produced without animal testing
- free of artificial fragrances, flavors or colors
- adequately labeled, listing ingredients and recommended use as required by law
- minimally packaged and/or recyclable

\*Good Manufacturing Practices: GMP standards provide documented practices and procedures for the handling, manufacture, processing, testing, packaging, labeling, storing and shipping of nutritional foods and dietary supplements. These guidelines ensure that products are safe, pure and potent and that label claims are accurate and truthful.

For more information on GMP go to [www.fda.gov](http://www.fda.gov) website
