

Farming Practices for Non-Certified Organic Growers

Name

Name of Farm

Address

Phone

E-Mail

Web Site

Please describe your farming practices:

What products are grown on your farm?

Are your seeds non-GMO sourced? _____

Are all of the inputs used on your farm either for production or processing, approved from the OMRI materials list? _____

(OMRI is the Organic Materials Review Institute that produces a complete directory of products allowed for organic production and processing. OMRI is a national non-profit organization which determines which input products are allowed for use in organic production and processing. OMRI listed or approved products may be used in operations that are certified organic under the USDA National Organic Program. For more information and a complete listing of approved products please check out their web site at www.omri.org or for more information contact Oryana at 947-0191 and speak with the Produce Manager. For your convenience there will be a copy of the OMRI Directory in the Produce Department.

If you use inputs on your farm that are not OMRI approved please list them and the purpose for which they are used:

What methods do you employ to build up your soils?

How would you describe your environmental practices?

I confirm that my practices are as stated above and I will contact Oryana to advise of any change.
